

Adobe

Transform campus productivity with a secure, all-digital document solution.

Providing a quality education involves countless tasks and processes. And while higher education institutions are adopting digital document solutions and workflows, they need to accelerate the transition to move beyond costly paper-based processes and enhance productivity, mitigate security risks, and comply with accessibility standards.

Empower faculty, staff, and administrators.

- **Enhance collaboration and streamline workflows** — Set up seamless, real-time PDF document workflows that enable everyone to create documents, simplify the review and approval process, and work together more efficiently — anywhere on any device.
- **Ensure security, accessibility, and compliance** — Help safeguard against data breaches from phishing attacks disguised as PDFs. Stay in control of your data while ensuring document security and encryption, and improve compliance by auto-tagging for accessibility to make content usable for everyone.
- **Easily integrate with leading productivity apps** — Create, edit, and share PDFs in Microsoft Office, Google Workspace, and Dropbox to enhance efficiency, collaboration, and security across document workflows.

With Adobe Acrobat Pro for enterprise, your institution gets the latest features along with security and accessibility updates, plus centralized license management and simplified deployment. It's easy to use, follows responsible data security practices, and takes just minutes to deploy.

Accelerate tasks and turn insights into action with generative AI.

With 80% of global workers facing information overload and spending hours searching and recreating content, faster access to information and better document productivity are essential.¹ With Acrobat AI Assistant, faculty, administrators, and staff can use generative AI to accelerate time to knowledge, generate insights seamlessly, and focus on what truly matters.

Adobe Acrobat AI Assistant reduces document summarization and analysis by up to 45% and content generation by up to 30%².

Adobe Document Cloud solutions

Adobe Acrobat Pro for enterprise

Provide secure digital document productivity.

Adobe Acrobat AI Assistant

Generate AI-powered document insights.

Adobe Acrobat Services APIs

Automated PDF generation, extraction, and tagging.

Adobe Acrobat Sign

Enable e-signatures and automated workflows.

Available for purchase as part of your Adobe license agreement.

Contact your Adobe Authorized Reseller to learn more.

Use cases: **Administrators and Staff**

- **Student Services** — Streamline the student journey from admission to graduation with digital forms, e-signatures, automated approvals, and secure archiving for applications, records, financial aid, and other student services.
- **Human Resources (HR) Management** — Simplify hiring, contract management, employee records, and onboarding with e-signatures, secure digital storage, and automated workflows, ensuring compliance and improving administrative efficiency.
- **IT Management** — Improve document security and accessibility compliance across campus, while enabling centralized management, efficient administration, and robust data protection.
- **Facilities, Procurement, and Legal** — Use AI to simplify contract creation by extracting key clauses and summarizing contracts, verifying compliance. Automate vendor contract approvals, purchase orders, and work requests through secure digital workflows with audit trails and version control.

Use cases: **Faculty**

- **Grading and providing feedback** — Digitally mark assignments with AI-assisted suggestions, add contextual comments, and streamline feedback submission from any device.
- **Instructional materials and distribution** — Generate study guides with AI-assisted insights; convert content for accessibility; organize PDFs with multimedia, quizzes, and links; and digitally distribute to students.
- **Collaboration on research** — Annotate research by extracting insights and use shared review tools to collect feedback from co-authors, all while protecting intellectual property with password encryption and access control.
- **Research and grants management** — Simplify grant reviews and proposals by summarizing information and extracting insights from key research documents and streamlining review and approvals digitally.
